

The Rate Penalty: Move-Up Market Bears the Brunt of Rate Hikes

Entry-level buyers remain insulated, while move-up properties face severe price degradation | N = 269,992 transactions

Source: STATS Indiana SDF deed records.

N = 269,992 transactions after regression filters (matched to FRED rate, sale price >\$50,000).

Luxury slope (-14%/pp) reflects thin market volatility, not behavioral rate sensitivity (~192 transactions/county/year). Peak observed gap of 4.6pp = 7.6% mortgage rate in the panel window.

Dashed line at 3.2pp = current rate gap at time of study.
